

WEEK 1: CUSTOMER DATABASE MODULE

Requirement Analysis

An e-commerce system manages customer and product-related information. In this week, the customer database requirements were identified and implemented using SQL.

Customer Table Creation

The customer table is created to store customer ID, name, email, phone number and created date.

```
SQL> CREATE TABLE Customer(Customer_ID INT PRIMARY KEY, Customer_Name VARCHAR(50) NOT NULL, Email VARCHAR(30) UNIQUE, Phone NUMBER(10) UNIQUE, Address VARCHAR(50), Registration_Date DATE NOT NULL);
```

Table created.

```
SQL> desc customer
```

Name	Null?	Type
CUSTOMER_ID	NOT NULL	NUMBER(38)
CUSTOMER_NAME	NOT NULL	VARCHAR2(50)
EMAIL		VARCHAR2(30)
PHONE		NUMBER(10)
ADDRESS		VARCHAR2(50)
REGISTRATION_DATE	NOT NULL	DATE

Insert Customer Records

Customer details were added to the table using the INSERT command.

```

SQL> Insert into customer values('&customer_ID','&First_Name','&Last_Name','&Email','&Phone','&Date');
Enter value for customer_id: 01
Enter value for first_name: Arun
Enter value for last_name: Kumar
Enter value for email: arun@gmail.com
Enter value for phone: 987653210
Enter value for date: 10-JAN-2025
old 1: Insert into customer values('&customer_ID','&First_Name','&Last_Name','&Email','&Phone','&Date')
new 1: Insert into customer values('01','Arun','Kumar','arun@gmail.com',987653210,'10-JAN-2025')

1 row created.

SQL> /
Enter value for customer_id: 02
Enter value for first_name: Priya
Enter value for last_name: Sharma
Enter value for email: priya@gmail.com
Enter value for phone: 9876532102
Enter value for date: 15-Feb-2025
old 1: Insert into customer values('&customer_ID','&First_Name','&Last_Name','&Email','&Phone','&Date')
new 1: Insert into customer values('02','Priya','Sharma','priya@gmail.com',9876532102,'15-Feb-2025')

1 row created.

SQL> /
Enter value for customer_id: 03
Enter value for first_name: Rahul
Enter value for last_name: Raj
Enter value for email: rahul@gmail.com
Enter value for phone: 9876532403
Enter value for date: 20-Mar-2025
old 1: Insert into customer values('&customer_ID','&First_Name','&Last_Name','&Email','&Phone','&Date')
new 1: Insert into customer values('03','Rahul','Raj','rahul@gmail.com',9876532403,'20-Mar-2025')

```

Display Customer Records

The SELECT command was used to display the records stored in the customer table.

```
SQL> Select * from customer;
```

CUSTOMER_ID	FIRST_NAME	LAST_NAME	EMAIL
01	Arun	Kumar	arun@gmail.com
02	Priya	Sharma	priya@gmail.com
03	Rahul	Raj	rahul@gmail.com
04	Divya	Devi	divya@gmail.com
05	Karthik	Raj	karthik@gmail.com

Update Customer Record

The UPDATE command was used to modify the phone number of customer ID 03.

```
SQL> Update customer set Phone = 9791223451 where customer_ID = '03';  
1 row updated.
```

The customer table was successfully created. Customer records were inserted, displayed and updated using SQL commands.
