WEEK 7 : SQL QUERY IMPLEMENTATION

Scenario:

The stationery shop has collected stationery item, customer, sales, and stock details. The management team wants to retrieve useful information from the database for daily shop operations and basic business analysis. Students will apply SQL queries to search, filter, sort, and generate reports from the existing Stationery Shop Management database.

1. Perform Basic SQL Queries

1. Display all customer details.

```
SQL> SELECT * FROM Customer;

CUSTOMER_ID CUSTOMER_NAME        EMAIL                          PHONE ADDRESS                                            REGISTRAT

        102 Priya Sharma         priya@gmail.com                9876532102 Chennai                                        15-FEB-25
        103 Rahul Raj            rahul@gmail.com                9876532403 Chennai                                        20-MAR-25
        104 Divya Devi           divya@gmail.com                9876532104 Chennai                                        05-APR-25
```

2. Display all available products.

```
SQL> SELECT * FROM Product;
