

Requirement Analysis Document

Proposed System: Stationery Shop Management System

Introduction

The purpose of this document is to analyze and define the requirements for a **Stationery Shop Management System**. The system is designed to help stationery shop owners manage products, customers, suppliers, sales, inventory, and billing efficiently. It reduces manual record-keeping, improves accuracy, and provides quick access to business information.

Objectives

- Provide a user-friendly system for managing stationery shop operations.
- Maintain records of products, customers, suppliers, employees, and sales.
- Track inventory and stock availability.
- Generate bills and sales reports.
- Reduce manual work and improve data accuracy.

Major Activities in the System

Customer Management

- Register new customers.
- Update customer details.
- Search customer records.
- View customer purchase history.

Product Management

- Add new stationery products (books, pens, pencils, files, etc.).
- Update product details.
- Delete discontinued products.
- Search and view product information.

Sales Management

- Record product sales.
- Generate bills and invoices.
- Calculate the total amount.
- Maintain sales history.

Inventory Management

- Add new stock.
- Update stock quantity.
- Monitor available stock.
- Display low-stock products.

Supplier Management

- Add supplier details.
- Update supplier information.
- Record purchases from suppliers.
- View supplier list.

Employee Management

- Add employee records.
- Update employee details.
- View employee information.
- Remove employee records if required.

Report Generation

- Generate daily and monthly sales reports.
- Generate inventory reports.
- Generate product-wise sales reports.
- View customer purchase reports.

Functional Requirements

MODULE	FUNCTIONALITY
Customer Management	Register, update, search, and view customer details
Product Management	Add, update, delete, search, and view products
Sales Management	Record sales, generate bills, maintain sales history
Inventory Management	Add stock, update stock, monitor inventory
Supplier Management	Add, update, delete, and view supplier details
Employee Management	Add, update, delete, and view employee records
Reports	Generate sales, inventory, customer, and product reports

Non-Functional Requirements

- **Performance:** The system should provide fast response during product search, billing, and report generation.
- **Security:** Only authorized users should access or modify shop data.
- **Reliability:** The system should store data accurately and minimize errors.
- **Scalability:** The system should support future expansion with more products and customers.
- **Usability:** The interface should be simple, user-friendly, and easy to navigate.

Conclusion

The **Stationery Shop Management System** provides an efficient way to manage all daily business activities, including product management, customer records, inventory, suppliers, employees, and sales. The system improves business efficiency, reduces paperwork, ensures accurate record maintenance, and supports better decision-making. This requirement analysis serves as the foundation for the design and development of the Stationery Shop Management System.
